

Allergen list

Checked against the physical labels and our suppliers' written declarations. **15 of our drinks contain none of the fourteen allergens regulated in the UK.** The rest are listed over the following pages with exactly what they contain.

BEFORE YOU ORDER

If you have an allergy, please speak to a member of staff before ordering. We will check every ingredient in your exact drink against this list. We never answer from memory.

We cannot guarantee that any drink is free from any allergen. All drinks are made by an automated system in a small kiosk. Ingredients pass through a shared mixer and a shared cup pathway.

COLOURS

Some drinks contain colours that carry a separate warning. They are marked with an asterisk in their own column, never in an allergen column. **A drink can contain no allergens and still carry that mark,** so please read both.

MILK AND OAT

Milk and oat come from two taps side by side. All drinks are made with fresh whole milk unless you ask for oat. No milk is added to an oat drink and no oat is added to a milk drink. But the two taps sit next to each other and either one can drip, so every drink made with fresh milk is marked **may contain cereals containing gluten**, and every drink made with oat is marked **may contain milk**. We would rather tell you this than let you find out. **Oats are a cereal containing gluten and must be declared.** Our oat drink also states that it **may contain traces of soya and tree nuts**, so every drink made with oat carries those two marks as well.

TREE NUTS

The only tree nut used here is **pistachio**. It is in Pistachio Milk Tea, Pistachio Fresh Milk, Pistachio Spanish Latte and Pistachio White Chocolate Matcha Latte, and it goes through the same system as everything else.

CHANGING YOUR DRINK

Every drink made with fresh milk is listed twice, once **(with milk)** and once **(with oat)**, because the answer is different and you should not have to work it out. **If you change anything else, read the options pages at the end as well.** Add the marks from the option you are adding and take away the marks from the option you are removing. **We do not use coconut in any drink. Caffeine is not an allergen,** it is listed because customers ask.

How to read this list

✓

under No allergens. Contains none of the fourteen. Checked against the label or a supplier declaration, not assumed. **Read the colours column as well.**

C

Contains. Named on the label.

M

May contain. Either the manufacturer makes it on a shared line, or it can reach the cup here in the kiosk. **If you are allergic to it, treat M exactly as you would treat C.**

—

Not present, on a complete label. **A blank cell never means safe.** Every cell carries a mark.

*

under Colours warning. Contains a colour which **may have an adverse effect on activity and attention in children.** **Not an allergen,** which is why it has its own column.
